Education

B.E computer science and engineering , Chennai Institute of Technology (CIT), 2025 - 2029, **CGPA: 8.44**

10th Grade- TN State Board-96.8%|12th Grade-TN StateBoard-94.8%

Projects

- **Smart Campus - Sustainable Development (Hackathon Project)** - Created a website to see overall data system information in a single website with integration of iot sensors realtime data with fire base and included 5 modules
- **RFID System (Hackathon Project)** - Automatic system to update the attendance of the teacher with instant data with streak created a website with databse this reduce the major problem in my campus
- **Voice controlled Robot (Hackathon Project)**- Designed a robot that follows a voice command to movement used web VOICE API to sent the command to the system with connecting to fire base for control for long distance using WIFI and built a website to control the Robot
- **E-COMMERCE Website** – software project the rectified the problems in amazon and flipcat added many feature to improve the userfriendly and efficient way
- **POMODORO Software** – HTML+ CSS + JS created a website for student to study effectively with TO-DO list and Pomodoro method of studing and Timer with leaderboard among friends ML to detect the attention span.
- **Student Count** -create a IOT system to measure the number of students in a class room using IR Sensor and ESP32 also created a website to monitor the data in real in any part of the world
- **Electricity Smart System** – Create a dashboard to measure the real time current usage using the current sensor and voltage sensor and ESP32 created a website that shows the cost of power usage and AI predict the future use of power in the website with daily cost amount.
- **Smart Dustbin** - using ESP32 and ultrasonic sensor to make smart dustbin that opens automatically and shows the level of waste in the DustBin also shows the value in TELEGRAM connected with BOT using API key
- **WATER Smart Tank** - Developing a web app with ESP32 to measure the real time water level in the tank and automatic motor ON and OFF system with access to control the motor by PHONE CALL
- **Restaurant Website** - using HTML+ CSS + JS created a website for restaurant for ordering the food and reviews system
- **AI- LiFi Data Transfer** - using Ardunino + Light Transferd the data using light (LiFi) for long distance secured Transfer
- **Smoke Detection** – using ESP32 + Fire sensor + Smoke Sensor and water Pump for fire accident send SMS call and notification to Fire Engine and alert message used automated call system.
- **Automated Smart Class room** – used PIR sensor to detect the person and automatic on and off light and fan off system with add fire base and website to monito and control

Skills

- **Python, C, C++, Java| Flask, Node.js, Express.js | SQL, MongoDB | HTML, CSS, JavaScript**
- **IOT & Electronics:** Arduino UNO & Nano,ESP32 , ALL Sensors, Microcontrollers, Robotics intermediate,Fire Base
- **Video Editing:** CapCut (pro) , DaVinci Resolve (Intermediate) , PicsArt (photo edit), Alight Motion
- **Tools:** Github, Google Colab, VS Code, GSheets, MS Word ,Excel, Power Point, , Canva
- **Soft Skills :** Idea pitching , PPT Presentation, Communication, Public speaking, Adaptability.

Problem Solving & DSA

- Solved **270+ LeetCode problems** (Arrays, Strings, Stacks, Queues, Hashing, Two Pointers, Basics of DSA)
- Solved **100+ Skill Rack problems** (C++, Python, logical problem solving)

Achievements

- **2nd PLACE** - CITIL SDG Hackathon, CIT On Campus (**CASH PRICE**)
- **FINALIST (TOP 7) – Only Founders Hackathon**, VIT Chennai.
- Participated in **CITCOS'25 Hackathon at Chennai Institute Of Technology** (Carnival Of Science)
- Participated in **Visa 24-Hour AI Hackathon (IIT Madras)**
- Participated in **INNOVATION EXPO** - built an AI-Based LIFI voice Communication
- **STARTUP Idea pitch** -in CITIL Innovation Lab
- **FounderX Global Summit'26** - had an **interview with STARTUP Founders** at **IIT MADRAS**
- **360* MARKETER Workshop – Hosted** and shared Experience in front of 300 students

Internship Experience

- **AI-ML Virtual Intern** - Google (via EduSkills) - {Oct 2025 - Dec 2025}
*Gained hands-on exposure to **machine learning concepts, model workflows, and real-world usecases***
- **Internet Of Things(IOT) Intern** - CodeAlpha · (Jan 2026 - Feb 2026)
*Gained practical experience in **Internet of Things (IoT)** by learning how to integrate **sensors, microcontrollers, and software** to build smart connected systems*
- **Digital Marketing Intern** – NIP(via EduSkills) - { Jan 2026 – Feb 2026}
*Learned and demonstrated **industry-relevant skills** that enhanced **my employability** and strengthen my confidence in the subject area.*
